ACT. 2

WAS
IF STILL
ALIVE.

STOP
PECCING
AROUND,
YOU'RE
SAYING
SHE'S
"DEAD-
DEAD!"

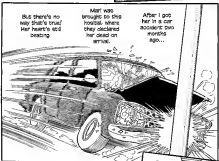

IT'S BEEN
OVER A
MONTH
ALREADY!

HER
HEART'S
STILL
BEATING

HOW LONG
ARE YOU
GONNA KEEP
TELLING ME
SHE'S DEAD?

Death isn't something instantaneous. You could say it's more of a very slow process.

PLEASE, LISTEN TO ME AND LISTEN WELL.

That's not the case with the brain though! Brain transplants aren't possible!

Practically the entire human body can regenerate itself, except if it's decomposed, of course.

You see, many people think that you're dead once your heart stops beating. But it can start up again and be replaced by another.

THAT'S YOUR JOB, ISN'T IT?

DOCTOR... HERE'S WHAT I EARNED IN A MONTH. PLEASE, DO ANYTHING YOU CAN TO SAVE ME!

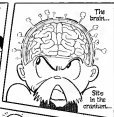

However, if one of the central parts of the brain is still alive, the patient will be in what we call a "vegetative state".

Not able to get nutrients anymore, the brain dies, causing the patient to become "brain dead".

A drop in blood pressure.

Absence of respiratory functions.

A deep coma.

"Brain death" consists of the following diagnosis...

As well as these symptoms persisting for at least 6 hours.

A flat-lined EEG.

Fully dilated pupils.

That don't respond to light.

...IF HE
FALLS, MR96
WILL BE
SOLD.

LIKE I'D
BE IN THE
MOOD TO
PICK UP
ANY CUS-
TOMERS
NOW!

AND
HE EXPECTS
ME TO JUST
LET HIM DO
WHATEVER!

NOT ONLY
THAT, SHE'LL
ALSO BE
CUT UP INTO
LITTLE
PIECES...

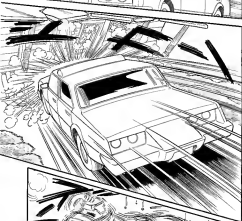

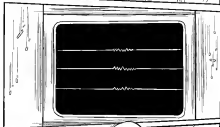

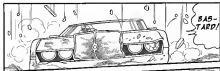

REMOVING
A CUS-
TOMER,
RIGHT
ABSOLUTELY!

Interested in working on this series or maybe another?
Golden Roze Scans is always looking for the following positions:

Translators (ANY LANGUAGE)
Editors / CLEANERS AND TYPESETTERS
Raw Providers
Proofreaders
Webmaster (URGENT)

Please visit our website or shoot an email to
